EXAMINER'S REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance, the prior of record does not teach:

ADAMS US 6,594,366

MIZUKAMI et al. US 6,069,960

ADAMS teaches an electronic device having a single transmission path (jack, 120) that may receive a telephone headset or a stereo headphone. The electronic device includes a telephone/communication controller (200), a radio controller (202), a controller processor (208), and a plug sensing component (201/210) that determines which plug type is connected. Applying a reference voltage through an impedance element and detecting impedance between jack 120 and ground will determine the plug type. However, ADAMS does not teach wherein the controller processor will send and receives input and output control signals from the stereo headphone. Further, ADAMS teaches internally switching from the radio controller to the telephone/communication, even if the stereo headphone is inserted, if a telephone call is received.

MIZUKAMI et al teaches an electronic device having a single transmission path (jack, d) that may receive a stereo headset mini-plug or stereo AV mini-plug. MIZUKAMI teaches detecting the voltage between the contact of the connected plug and ground to

Art Unit: 2182

determine what type of mini-plug is inserted in the single transmission path. However, MIZUKAMI is silent in respect to a controller processor and individual controllers for the plurality of types of mini-plugs that may be inserted in the signal transmission path.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
